

Aspiring Entrepreneurs Graduate at C4DLab

C4DLab has held its graduation ceremony to usher out several startups after successfully completing their incubation period. The ceremony was attended by Dr. Tonny Omwansa, Director for C4DLab and Prof. Timothy Waema at C4DLab.

The startups graduating from AFTIA programme include the Vospine. Vospine is a social networking platform. It brings together different people having similar interests to share their experiences and knowledge with REQUEST, which is a platform that offers a solution of monitoring music.

Another startup was the Elimu Advisor. Elimu Advisor is a web platform that helps and guides the KCSE graduates on career choices. On the list was the M-KULIMA. It is a company that uses the Internet of Things to increase efficiency of farming. Other startups on the graduating list were, Learnmine, M-ASCA, CipherTech, Silicon Savannah and the Proolabs, a startup leveraging on the power of analytics to provide fraud investigation insight. The graduation of these nine tech businesses paves a way for another round of admission of new promising ideas at C4DLab.
