

## Google Apps Developer Challenge 2012

In the on-going, [Google Apps Developer Challenge](http://www.google.com/events/gadc2012/), 3 teams from C4DLab have managed to proceed to the semi-finals. The full list of semi-finalists world-wide can be found here: <http://www.google.com/events/gadc2012/finalists/>

The 3 teams are:

- [Daro](#), *Daro, swahili slang for 'class', is a simple app for managing a class.*
- [QuizerApp](#), *An app intended to make classroom revision easier and fun, both for the lecturers (tutors) and the students.*
- [Tunebanda](#), *Tunebanda is a easy-to-use music player application for Google Drive*

Now the teams are working hard to refine their apps as they gear on getting the \$20,000 prize! We wish them all the best
