This event will be held on 2nd February 2018 from 2:00pm to 5:00pm and aims to train 50 students on Google Cloud Platform Essentials.

Want to get started on the Google Cloud, but don't know where to begin?

Join us for our Cloud Study Jam! Together we'll work through three Google Cloud Platform Essentials labs, then you will get free access to the next quest so you can finish this series of labs at home to get a Google-hosted badge for your online profile. You will be able to get hands-on experience with Docker, Kubernetes and Scientific Data Processing, which will earn you additional badges.

Join this meetup to get official Google training, a \$70+ value, free of charge.

What to bring:

Bring your laptop -- Mac, PC, Chromebook, Linux, everyone's welcome.

Bring your laptop charger.

The labs will run on all of the latest versions of the popular browsers. For the best experience, make sure your laptop has Firefox or Chrome installed.

Create a Qwiklabs account at [https://google.qwiklabs.com/users/sign\\_up](https://google.qwiklabs.com/users/sign_up). Make sure you check the opt-in box for promos! That makes you eligible for additional free access after you complete the first series of labs.

Come and learn the fundamentals of the Google Cloud Platform, how to run containers on it and how to use the platform for data engineering. And Many more.... Looking forward to see you.
