Paul Kagiri Muriithi (P15/1322/2011)

Creatix Systems (C4D Lab)

Creatix Systems is a startup based at the C4D Lab. Creatix Systems deals with development of robust and usable enterprise-level, mobile-based and web-based systems.

Duration: April to June 2014

Functions Performed

Android mobile programming in the development of the Geoaddress - an alternative addressing system for both personal and enterprise users who are tired of the obsolete postal addressing and un-standardized house numbering systems. The solution is structured around users' geolocation to create an accurate and flexible addressing scheme.

Key Lessons Learnt
- Software development best practices
- Time Management
- Team work
- Professionalism
- Marketing
- Presentation/Pitching
- Appreciation of real world problems and challenges
