

**UNIVERSITY OF NAIROBI
COLLEGE OF BIOLOGICAL AND PHYSICAL SCIENCES
SCHOOL OF COMPUTING AND INFORMATICS**

INDUSTRIAL ATTACHMENT BRIEFS

Name of Student: Kelvin Wanyama Murumba
Registration No: P15/1485/2013
Institution Attached: Afya Info UON
Period of Attachment: March – April 2016

Objectives

1. Exposure to industrial work environments
2. Active participation in creating practical solutions using knowledge learnt
3. Build professional networks with potential employers

Activities Undertaken

HI4K Boot Camp

This was a six weeks period where I was able to put my skills to test through the systems that I and my team worked on. Interacting with interns from Kenyatta University, Nazarene and Masaai Mara University was a valuable venture. It was not only the time for putting the skills into practice but also exchanging. I was privileged to work with a team on a health system that is currently being rolled out in health facilities across the country (Electronic Dispensing and Tracking Tool, EDITT).

Mentorship by Savannah Informatics Staff

I had the opportunity to attend the talk on Interoperability in Health Systems from CEO co-founder of Savannah Informatics, a company that develops health systems and informatics. It was a mind opening experience and especially with my passion in health informatics.

Lessons worth Sharing

In addition to the technical skills gained in the internship program, I have learned the following from Afya Info:

- Health informatics is one of the areas in computer science that is worth investing not only in Kenya but the rest of the world.
- Teamwork is key in any software development environment; it is a platform for growth and exchange.
