

Safaricom talk at the School of Computing and Informatics

On Friday 19th, January 2018 we received 2 visitors from Safaricom that I had invited to come and speak to the students in the school. One speaker was Ahmed Yehia, (include his position that he wrote on the paper) and Maureen Wanjiku, Senior HRBP.

The speakers were invited to speak on several topics such as:

1. Opportunities at Safaricom: Graduate opportunities, Internships, etc.
2. Trending Technologies and how Safaricom is using them: Data Science, Machine Learning etc.
3. The role of Computer Science in Telecom companies like Safaricom
4. Qualifications and experience that Safaricom looks for during recruitment

Ahmed spoke on further topics like DevOps, Data Science and the importance of being involved in startups. Maureen as well cleared out some issues on recruitment by Safaricom and how students need to prepare for the whole process.

We had a Q&A towards the end which allowed students to ask further questions that they had.
