SKIRTS Foundation – Cyber Security

As part of the School of Computing and Informatics mentorship programme aimed at increasing student knowledge of professional life, a team of founders of the SKIRTS Foundation held a session on Privacy and Security in the Internet Age. The highly interactive and motivating session took place Wednesday June 15, 2016 and was attended by about 50 undergraduate students. Yvonne Oluoch (above) and Eva Mburu (below) the founders of the Foundation (http://www.skirtsfnd.org/) took the students torugh various issues relating to privacy and cyber security in the internet age. This talk session also focused on understanding gender parity in tech, online violations and how social media works for inclusivity for all.

S.K.I.R.T.S works with young women by empowering then to harness the power of technology to make their voices visible and to the right audiences
