

MICHAEL FORTIN, CORPORATE VICE PRESIDENT, MICROSOFT

Michael Fortin is Corporate Vice President of the COSINE Data & Intelligence team. With his team, Fortin is responsible for helping deliver the common core that powers Windows. Prior to leading COSINE's DI team, Fortin worked as a Vice President, Distinguished Engineer, and Developer across a wide range of Operating System areas including performance, compatibility, security, reliability, the kernel, file systems, hypervisor, and more.

Fortin joined Microsoft, from IBM, in 1997. He has a Ph.D. and Master's in computer science from The Ohio State University, and a Bachelor of Science degree from Xavier University.
