CSC431 NETWORK MANAGEMENT

Learning Outcomes

- Describe network management and the network management architecture
- Explain the various functions of network management.
- Gain in-depth theoretical and practical knowledge of network management, and in particular of SNMP (Simple Network Management Protocol).
- Compare a number of variations of the network management architecture.

Content

Pre-requisites

- CSC123 Data Communications
- CSC225 Computer Networks
- CSC423 Wireless Networks and Mobile Computing.

Delivery

Lectures, Tutorials and Case studies
